

A BETTER TOUCH SYSTEM

For years I've been underscoring the importance of regularly "touching" your prospects, customers and clients to ensure you stand out from the competition.

One of the more effective tools I've used has been taking photos and quickly turning them into photo cards with my own personalized messages. They've generated hundreds of thousands of dollars in business for me over the past couple years, as well as my clients, and the momentum grows.

Many others have done this too and found it great for:

- **Prospect follow-up touches that stand out**
- **Go "wide & deep" to build stronger relationships**
- **Memorable and emotional connections**

I've found that SendOutCards has extensive features that work better as a business touch system compared with others geared more for the non-business user. And get this... Cards + Postage cost about \$1 with SendOutCards vs. \$3 at the other places!

Take a free test-drive with a card for yourself. Visit www.sendoutcards.com/jackdaly and "Click Here to Send A Free Card" at my site. The first 100 people can send a card on me for free. Enjoy!

I asked Kathy to assist you with questions or any hands-on help you may need. For more information please call her at (916) 705-0603 or email her at kathy@impactsalescoach.com.
